

JD Gyms installs Automatic Systems Security Lanes

Background

JD Gyms is a state of the art award winning facility playing host to a mix of the industry's leading fitness equipment and classes. With over £1.5 million invested it boasts cutting edge fitness at affordable prices.

Situation

JD Gyms was looking for a security solution at each of their club locations to be used by staff and gym members to prevent unauthorised personnel entering while the reception areas were not manned.

They had originally installed tripods and gates at a couple of their locations but wanted something more aesthetically pleasing with increased security.

Tender Process

JD Gyms approached a number of system integrators to quote for the above works. However due to their desire to use Automatic Systems Firstlane and because they had a long standing relationship with JD Omega Security Systems, secured the contract. Omega can provide a bespoke access control installation using Automatic Systems products, whilst keeping with the overall layout of JD Gyms.

Solution

As JD Gyms were looking for a standardised layout at each of their locations Automatic Systems proposed one wide and three standard Firstlanes.

Adaption had to be made to the Birmingham site as their layout was a lobby detached from the main entrance so the Firstlane was replaced with Automatic Systems Slimlane with 1700 high glass to give greater security, whilst still being aesthetically pleasing to the standard layout.

Future work

The installation was completed with no complications within the time frame given. With JD Gyms constantly looking to expand their business they will look to continue using Firstlane for the duration.

“Using this product for JD Gyms gives Omega Security and our client confidence that it is robust and reliable for many years to come” Richard Ward Omega Security”

FirstLane

The FirstLane swing door security entrance lane offers a high bidirectional throughput and uncompromising security.

With its elegant design, the FirstLane is designed to integrate perfectly into any architectural style. Equipped with high processing capacity and an exclusive detection system, the FirstLane guarantees accurate user tracking and prevents any unauthorised use.

The FirstLane is a modular product that can be installed as a single or a multi-lane array.

SlimLane

The SlimLane security entrance lane offers a high bidirectional throughput and uncompromising security.

With its transparent, elegant design and minimal footprint, the SlimLane is designed to integrate perfectly into any architectural style.

Equipped with high processing capacity and an exclusive detection system, the SlimLane guarantees accurate user tracking and prevents any unauthorised use.
