# AccessLane

The swing gate by Automatic Systems

The AccessLane swing gate facilitates the passage of people with reduced mobility (wheelchair users, service staff with trolleys, bulky equipment, etc.) as well as during the evacuation of the building during an emergency.

With its transparent, elegant design and minimal footprint, the AccessLane is designed to integrate perfectly into any architectural style while offering a high bidirectional throughput.

## ▲ FEATURES

- Smooth and silent movement
- Compatible with most access control systems
- Circular LED pictogram for intuitive use
- IP Connected
- Configurable opening width
- Breakaway feature in path of egress
- 120 Volt
- Low power consumption (less than 10w at rest and 15w during operation)
- Easy installation
- 5 year warranty

## ▲ OPTIONS

- Obstacles available up to 72" (1800mm) in height
- Custom Logo on obstacles
