

### Safety notice

The barrier must be inspected frequently to spot all wear, corrosion or crack being able to cause damage, especially if the barrier has an excessive duty service (frequent opening before the end of the closing cycle).

If the barrier is damaged or hit, it must be inspected by competent personnel to spot all damages or cracks.

The barrier and the fence must be cleaned of all ice accumulation or of snow to avoid the load increase.

No object (light, sign etc.) must be added to the barrier.

The fence must not be modified without authorization of Automatic Systems America Inc.

The barrier must be put out of service if cracks appear or if the safety of the people is compromised.
