

AS AUTOMATIC SYSTEMS

Access Controlled...
Future secured

AUTOMATIC SYSTEMS is a world leader in the automation of secure entrance control. The company has been designing and manufacturing pedestrian and vehicle access systems for over 50 years.

Founded in 1969, **Automatic Systems** has developed a unique know-how in the design of high-end obstacles, one-person detection and throughput management making it a brand renowned for the high quality of its products in terms of performance and reliability.

The company is part of the Bolloré group, assurance of a long-term investment strategy and stability for the company.

Our large worldwide business network includes offices and subsidiaries in Canada, the United States, Belgium, France, Spain and the United Kingdom; a vast international network of distributors and local partners, as well as 5 manufacturing plants (3 in Belgium, 1 in France and 1 in Canada) and 3 R&D sites.

- Every day, more than 100 million people use Automatic Systems' equipment worldwide.
- 300,000 units are installed in 150 different countries.

Automatic Systems believes in its long-term commitment to service and quality. Our products are designed to meet the needs of our clients who know they can always rely on us.

At Automatic Systems we know that the only way to stay at the forefront of market trends and customer requirements is by innovating and mastering technology. That's why we invest heavily in Research & Development and have highly advanced resources and expertise for all equipment components (mechanical, electronic, software, etc.).

Operating worldwide, we provide a network of sales, customer service and maintenance programs, technical support, spare parts and training facilities. Our partners have privileged access to Automatic Systems full documentation via our extranet platform, Partnerweb.

Our Pedestrian Products

Entrance control automation in a building or at the perimeter of a site allowing high throughput capacity while increasing security and reducing operating costs. Automatic Systems offers a wide range of innovative, elegant and high performance products designed for controlling pedestrian access while combining security, speed, and user protection with very high reliability. Our products are compatible with all access control systems.

Automatic Systems' pedestrian portfolio includes optical turnstiles, SmartLane and SlimLane, Swing Gates, Tripod and Full-Height Turnstiles, Security doors - ClearLock, RevLock and the InterLock series.

Our Vehicle Products

Whether for toll roads, parking areas, access to bridges, tunnels or the entrance control of private, industrial or sensitive sites as well as traffic management, Automatic Systems has a comprehensive range of barriers (short and medium length, security, fenced and extra-long), suitable to all sorts of applications.

The Automatic Systems vehicle product portfolio includes the flagship product BL229, the rising barriers BL4x and the ParkPlus 100 & 101. There are also our fenced rising barriers the BLG76 & BLG77 and our HD high security automated gates. A comprehensive product offering from which our customers can find the automated gate best suited for their application.
