

MASK DETECTION

SKIN TEMPERATURE SCREENING

COUNTING USER PASSAGES

AUDIBLE AND VISUAL ALARMS

RESULT MESSAGE DISPLAY

Shaken by an unprecedented global health crisis, respect for measures to protect individuals has become critical. Guaranteeing a healthy environment for visitors and employees is an organization's duty.

It is the responsibility of leading manufacturers of access control equipment such as Automatic Systems to offer fast and effective solutions to help provide maximum protection for all individuals. Automatic Systems' pedestrian gates, with the SafeFlow software predisposition option, create an automated process, to help preserve social distances and insure that public health requirements are respected.

- ✓ Access to authorized people only and passage detection to stop unauthorized passages
- ✓ Access without credentials, if measures are compliant (mask, ...)
- ✓ Management of entry and exit into the area is respected
- ✓ Counting user passages

- ✓ Compatible with SlimLane Standard and Short Cabinet (SC)
- ✓ Compatible with SlimLite
- ✓ Compatible with UL2593 certified SlimLane for maximum user protection
- ✓ Wide Lane available (ADA compatible)

Pedestal for any product

- ✓ Reduced footprint
- ✓ Compatible with new or existing AS product installations including SmartLane, AccessLane, ClearLock or RevLock

KEY BENEFITS

- ✓ Monitoring with our without credentials
- ✓ Integration ready
- ✓ Reliable and intuitive
- ✓ Able to retrofit with existing installations
- ✓ Reduced footprint with TriLane TL1
- ✓ Counting user passages

IMPORTANT INFORMATION AND DISCLAIMER OF WARRANTY AND LIABILITY

Automatic Systems (AS) solutions for screening are designed to support the detection of skin-surface temperatures so as to help achieve rapid preliminary screening in public areas. AS solutions must not be relied upon beyond their intended use. The actual core body temperature may not be properly detected due to measurement error tolerances, and can only be confirmed by using measurement devices designed for clinical use. AS solutions for screening are not capable of being used to assess whether a person is infected or not by Covid-19 or by any other disease. Laws and regulations, including but not limited to privacy and data protection laws, may i) prohibit the use of thermographic cameras and facial detection, and/or ii) condition such use on prior authorisation delivered by public authorities or private entities and/or iii) require that Customer comply with any and all applicable employment, labor, non-discrimination and privacy laws while using thermographic cameras and facial detection solution, and/or iv) impose upon Customer requirements to provide adequate notice of information practices to the public. Automatic Systems disclaims i) any warranties, conditions or other terms implied by any law (including as to merchantability, satisfactory quality or fitness for a particular purpose and the equivalents thereof under the laws of any jurisdiction), and ii) any liabilities, costs and damages, to the fullest extent permitted by applicable law, arising out of, or in connection with, the purchase and the use of thermographic cameras and facial detection.
